EDUCATION

2024 - 2027 *University of Bucharest*
Faculty of Mathematics and Computer Science
Specialization: Computer Science, Admission GPA: 9.93
Faculty of Psychology and Education Sciences - Pedagogical Training Program
2020 - 2024 *National College "Vasile Alecsandri", Galați*
Baccalaureate GPA: 9.66

RESEARCH & PUBLICATIONS

Investigating bias patterns in LLMs across Romanian historical contexts
Co-authored a paper for ConsiLR 2025 Conference: "A Cross-Lingual Analysis of Bias in Large Language Models Using Romanian History"; research showcases how LLMs behave when prompted to provide a viewpoint on debated historical concepts.

PROJECTS

CivicMind : Developed an AI-powered platform for legislative transparency, aggregating government data and generating explainable law summaries, Pro/Con analyses, and politician Impact Scores; built data pipelines and backend services using Python (Django as framework), Python (via FastAPI for dynamic scraping), PostgreSQL, and multi-agent LLM architectures (LangGraph, Mistrall APIs), my work being well-rounded and overall distributed for dynamic scraping scripting, backend and frontend integration.
Grapher - Task Management Web App : Developed a full-stack web application using ASP.NET Core and C# for backend, Mermaid.js for dynamic graph visualization in the frontend; implemented user-auth, task CRUD operations, and real-time collaboration features.
Signal Object Detection Participated in a Kaggle competition that revolved around a multi-class classification task of detecting signals; served as an introduction to CNNs.
HLTV-DB : Implemented a comprehensive database of proffessional Counter-Strike, similar to HLTV.org, built using PL/SQL and deployed on Oracle Database.
macoq - Synchronization Library : Created a lightweight C library implementing various synchronization mechanisms for concurrent programming, using *<stdatomic.h>* only.
QR Code Generator : Developed a dynamic QR Code Generator from scratch using vanilla JavaScript; this project walked me through the basics of data encryption, processing and analysis.
File Manager Simulator : Implemented in x86 Assembly (AT&T syntax); simulates virtual memory blocks behavior and provides a clear, didactic visualization, enhancing understanding of low-level system operations.
ToonLander - 2D Platformer Shooter Game : Designed and developed a 2D platformer shooter game in C++ using SFML, applying *Object-Oriented Programming (OOP) principles and robust software design patterns critical for building scalable and maintainable software.*

WORK EXPERIENCE

2025-2026: Tutored first-year Computer Science students in Introductory Computer Architecture and Databases, conducting weekly interactive seminar sessions for groups of around 15 students.
2026: Informatics Tutor at *Centrul de Meditații și Dezvoltare Personală Algorithm*, working mainly with final-year high school students in preparation for graduation and examinations.

HONORS, AWARDS & ACTIVITIES

2024: Third Prize, MateInfoUB Competition – Mathematics Section.
2024: Participant, MateInfoUB Competition – Computer Science Section.
2020 – 2023: Volunteer Member, Leo Alpha Danubius Galați. Developed leadership and organizational skills through community projects.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript *(TypeScript)*, Java, C#, C++, C, Haskell
- **Tools** & **Technologies:** Docker, Git, Unix/Linux (shell scripts), Spring Boot, ASP.NET Core, NumPy, LaTeX, SQL
- **Soft Skills:** Adaptability, Critical Thinking, Problem-Solving

LANGUAGE SKILLS

Native Language: Romanian
English: Advanced (C2 Level, Cambridge average Score 202); **German:** Basic (B1 Level)
